

String mini

Dante Donegani & Giovanni Lauda
2021

IT – Rispetto alla sorella maggiore, String MINI è ridotta nelle dimensioni ma ha identiche prestazioni luminose e non perde nulla della propria funzionalità. Infatti, anche in questa versione i due bracci hanno il movimento bilanciato dal cavo elastico colorato e la tipica testa rotonda con il foro centrale per impugnarla comodamente, regolare ed orientare la luce in tutte le direzioni. Le dimensioni ridotte la rendono ancora più versatile: montata sulla base o sul supporto a muro è a suo agio negli spazi ridotti di una scrivania o accanto al letto.

EN – Compared to the original version, String MINI is smaller in size but has the same lighting performance and does not lose its functionality. Also this version has two arms with the movement balanced by the coloured elastic cable and the typical round head with a central hole to comfortably grip, adjust and direct the light in all directions. The small size makes it even more versatile: mounted on the base or on the wall support it is perfect for small spaces on a desk or next to the bed.

DE – Im Vergleich zur originalen Version ist die neue String MINI kleiner, sie verliert jedoch nichts an Leistung und Funktionalität. Auch diese Version hat die zwei Arme, die durch das farbige elastische Kabel bewegt werden, und den typischen runden Kopf mit einem zentralen Loch, um das Licht bequem zu dimmen und in alle Richtungen orientieren.

FR – Comparée à sa grande sœur, String MINI est plus petite en taille tout en préservant ses fonctionnalités et performances d'éclairage identiques. En effet, même dans cette version, les deux bras ont un mouvement équilibré par le câble élastique coloré et la tête ronde typique avec le trou central permet de la manipuler aisément, ajuster et orienter la lumière dans toutes les directions.

ES – En comparación con su hermana mayor, String MINI es más pequeño en tamaño pero tiene un rendimiento de iluminación idéntico y no pierde su funcionalidad. De hecho, incluso esta versión tiene dos brazos con el movimiento equilibrado por el cable elástico de color y la típica cabeza redonda con un agujero central para agarrar, ajustar y dirigir la luz cómodamente en todas las direcciones.
